

TECHNICAL LITERATURE

SILTEX 30741/ Lipas – OL –P

Siltex 30741/Lipas -OL-P is a liquid Non ionic detergent and wetting agent with good emulsification properties for preparation and processing of all textile substrates.

Characteristic:

Type:	Non-ionic
Appearance:	Clear liquid
Solubility:	Soluble in water in all proportions
Compatibility:	Stable to hard water, acids, alkalis and solution of metallic salts

Features

- Acts as a good detergent for effective removal of lubricating oil stains by virtue of its emulsification properties.
- Is very suitable as a scouring agent for cotton, viscose rayon, synthetics and blends and as a wetting/penetrating agent in pad-application and bleaching processes.
- Effective in wool and worsted scouring, especially along with common salt solution.
- Can be used for scouring of wool tops in liquor-circulating machines.

Storage

Stable when stored in normal storage conditions.

Application

- In textile processes where wetting is required 1 – 3 g/l Siltex 30741/Lipas -OL-P in the liquor.
- As a detergent and penetrant 1 – 3 g/l Siltex 30741/Lipas -OL-P is usually sufficient.
